

This New Super Surface Mount Resistor Kit™ contains 0402 size SMT resistors, of either **196 values (1 kit)**, or **760 values (4 kits in a set)**, see the tables below.

0402 1/16W 1%: [See 196 Value Resistor Datasheet;](#)
[See 760 Value Resistor Datasheet.](#)

There are four combinations for the amount of resistors per value in one kit:

20 PCs per value for rarely used values and 50 PCs per value for commonly used values;

40 PCs per value for rarely used values and 100 PCs per value for commonly used values;

50 PCs per value for rarely used values and 200 PCs per value for commonly used values;

100 PCs per value for rarely used values and 500 PCs per value for commonly used values;

The resistors are pre-sorted and stored separately in our unique sturdy snap-lock [New SMT Component Enclosure](#), which has **200 individually lidded compartments**:

0.52"(L)×0.71"(W)×0.39"(D); or,
 13.2mm(L)×18mm(W)×10mm(D).

Each resistor value is printed clearly on each lid. The enclosure takes the same surface space as a letter size paper and measures only:

12.2"(L)×9.5"(W)×1.6"(H); or
309mm(L)×242mm(W)×40mm(H).

Operating the enclosure is easy and convenient so that your time for obtaining a particular resistor is minimized to seconds.

The kits can easily be placed on a work bench, put on a shelf, or transported to other sites, and are the best choice for building prototypes, doing experiments on new circuits, or reworking printed circuit boards.

NOTICE

1. ATI warrants performance of its products for one year to the specifications applicable at the time of sale, except for those being damaged by excessive abuse. Products found not meeting the specifications within one year from the date of sale can be exchanged free of charge.
2. ATI reserves the right to make changes to its products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete.
3. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability. Testing and other quality control techniques are utilized to the extent ATI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.
4. Customers are responsible for their applications using ATI components. In order to minimize risks associated with the customers' applications, adequate design and operating safeguards must be provided by the customers to minimize inherent or procedural hazards. ATI assumes no liability for applications assistance or customer product design.
5. ATI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of ATI covering or relating to any combination, machine, or process in which such products or services might be or are used. ATI's publication of information regarding any third party's products or services does not constitute ATI's approval, warranty or endorsement thereof.
6. IP (Intellectual Property) Ownership: ATI retains the ownership of full rights for special technologies and/or techniques embedded in its products, the designs for mechanics, optics, plus all modifications, improvements, and inventions made by ATI for its products and/or projects.
