All the Zener diodes in these kits are offered in the convenient and space saving surface mount plastic packages. They are designed to provide voltage regulations with minimum space requirement and low cost. In the tables below, the Zener diodes are categorized by their power ratings. All the values are detailed in the tables below. Abbreviations used are: ZD stands for Zener diodes; R stands for radix point; and D is short for differential. The four kits currently being offered include 95, 104, or 108 distinct diode values within their own defined power range. The Zener voltage of the **ZDR35/3/2W104V20/50D Series** ranges from 2.4 V to 75 V. The Zener voltage of the **ZD3/1/R5W95V30/50D Series** is from 2 V to 200 V. **ZDR35/3/2W104V20/50D Series** diodes include: 200 mW, 300 mW and 350 mW. **ZD3/1/R5W95V30/50D Series** diodes include: 500 mW, 1W and 3W values. Only brands with excellent performance were carefully selected for inclusion in the kits. For specific details, please consult the datasheets.

Part No.	Description	Price
ZDR35/3/2W104V20/50D	104 values below 350 mW power Zener diodes size, 50 pcs/value	\$490
ZD3/1/R5W95V30/50D	95 values above 500 mW power Zener diodes size, 30 pcs/value	\$790
TVS600W108V20/50D	108 values 600 W power TVS size, 20 pcs/value	\$590
TVS1500W108V20/50D	108 values 1500 W power TVS size, 20 pcs/value	\$990

TVS refers to Transient Voltage Suppression diodes. The series of TVS diodes are designed specifically to protect sensitive electronic equipment from voltage transients induced by lightning and other transient voltage events.

TVS kits are available, **TVS600W108V20/50D** and **TVS1500W108V20/50D**, and both provide diodes supporting a Reverse Stand off Voltage range from 5.0 V to 440 V. Both 600 W TVS and 1500 W TVS diodes are offered. They contain the unidirectional and the bidirectional varieties with the suffix **A** designating one-way, and suffix **CA** meaning two-way.

The amount of Zener diodes included per value is different for each kit. All Zener diodes are pre-sorted and stored separately in our unique sturdy snap-locking case.

**Super SMT Component Enclosure™** has **128 individually lidded compartments**, 0.87" (L) x 0.59" (W) x 0.63" (D) or 22 x 15 x 16 (mm), and each Zener diode value is printed clearly on each lid. The enclosure covers the same surface area as a letter size paper sheet and measures only:

**11" (L) x 8.5" (W) x 1.75" (H) or 280 x 216 x 45 (mm).**

Usage of the custom enclosure is easy and convenient so that your time for obtaining a particular Zener diode is minimized to seconds.

These diode kits can easily be placed on a work bench, put on a shelf, or transported to other sites, and are the best choice for building prototypes, doing experiments on new circuits, or reworking printed circuit boards.

**NOTICE**

1. ATI warrants performance of its products for one year to the specifications applicable at the time of sale, except for those being damaged by excessive abuse. Products found not meeting the specifications within one year from the date of sale can be exchanged free of charge.
2. ATI reserves the right to make changes to its products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete.
3. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability. Testing and other quality control techniques are utilized to the extent ATI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.
4. Customers are responsible for their applications using ATI components. In order to minimize risks associated with the customers' applications, adequate design and operating safeguards must be provided by the customers to minimize inherent or procedural hazards. ATI assumes no liability for applications assistance or customer product design.
5. ATI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of ATI covering or relating to any combination, machine, or process in which such products or services might be or are used. ATI's publication of information regarding any third party's products or services does not constitute ATI's approval, warranty or endorsement thereof.
6. IP (Intellectual Property) Ownership: ATI retains the ownership of full rights for special technologies and/or techniques embedded in its products, the designs for mechanics, optics, plus all modifications, improvements, and inventions made by ATI for its products and/or projects
