

# High Efficiency Super Bright LED Bulb

## SILVERLED-1N6V

### FEATURES

**Five Times Longer Battery Usage Time than Using Incandescent Bulb**

**High Luminous Flux:** > 90 lumens

**High Immunity to RF Interference**

**High Efficiency:** 96%

**Long Lasting:** > 10 Years

**100 % Lead (Pb)-free and RoHS Compliant**

**Low Cost:** pay off by itself in 12 days by saving the batteries for railway companies

### APPLICATIONS

Drop-in replacement for incandescent bulbs in railway lanterns or 4 cell flash lights (battery polarity must be reversed when installing the batteries).

### DESCRIPTION

The SILVERLED™-1N6V is an LED bulb, as shown in Figure 1, it is designed to be a drop-in replacement for the incandescent bulbs used in 6V lanterns or 4 cell flashlights. Table 1 shows the part numbers for the incandescent bulbs it can replace, Figure 2 shows their physical photo. This LED bulb can run off either from a 6V lantern battery or a 4 cell battery bank, and can be installed instantly into the industrial lanterns as shown in Figure 4 in next page or regular 4 cell flashlights, and can be installed instantly as a drop-in replacement for the original incandescent bulb.

Table 1

Incandescent Bulb Part #	PR12	PR13	PR17	K12	K15
Rate Voltage (V)	5.95	4.75	4.90	5.95	4.80
Rate Current (A)	0.50	0.50	0.30	0.70	0.70
Incandescent Bulb Part #	HPR36	HPR40	HPR50	HPR55	HPX53
Rate Voltage (V)	5.50	6.00	5.20	5.20	6.00
Rate Current (A)	1.00	0.67	0.85	0.50	0.975

Since the controller works at high efficiency within a wide input voltage range, 3.2 V to 6.2 V, the energy in the battery is drained out deeply, resulting in a longer battery usage time of the battery.

This bulb uses a highly stable current stabilization circuit to keep the output current constant, so that it can tolerate strong interferences from other electronics, such as Walkie-Talkies.

The SILVERLED comes with over temperature protection function. In case the LED gets too hot due to improper heat-sinking or high ambient temperature, the controller will keep working but lower the driving current sent to the LED, the

bulb temperature will stop rising, the controller will be working under constant temperature control mode, so that the life time of the LED would not be shortened, nor its electrical-to-optical conversion efficiency will be degraded.

### SPECIFICATIONS

Table 2 Characteristics ( $T_{\text{ambient}} = 25^{\circ}\text{C}$ )

Parameter	Value	Unit/Note
Input working voltage	3.2 ~ 6.2	V
Output current	$350 \pm 20$	mA
Output voltage	$3.3 \pm 0.2$	Volt
LED electric power	$1.2 \pm 0.1$	Watt
Luminous output	> 90	lumen
Illumination intensity	> 2800	lux @ 2 meters
Typical efficiency	96%	$V_{\text{IN}} = 4.8\text{V}$
Operating ambient temperature	-40 ~ 55	°C
Protection trigger temp.	85	°C

## CONDUCTOR INTRODUCTION

**Negative Terminal:** It is the center nipple of the bulb and connects to the negative terminal of the battery, see Figure 3 below.

**Positive Terminal:** It is the main body of the bulb and connects to the positive terminal of the battery, see Figure 3 below.

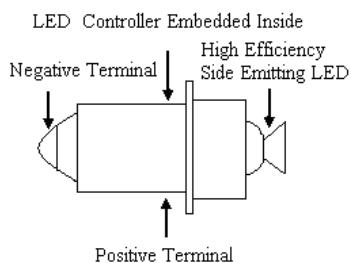

Figure 3. Side View of SILVERLED-1N6V

## MARKING

- The SILVERLED-1N6V bulb is marked “1N6V” on the bulb body.
- The SILVERLED-1N6V bulb has a **BLACK COLOR** ring on the top.

## INSTALLATION

- When using the SILVERLED-1N6V bulb in the industrial type of lanterns as shown in the Figure 4 below, just remove the incandescent bulb and insert the LED bulb.
- When using the SILVERLED-1N6V in 4 cell flashlights, **make sure to reverse the orientation of the batteries** and then install the LED bulb.

### ORDERING INFORMATION

Table 3 Part Number

Part #	Description
SILVERLED-1N6V	1 Watt LED, $\eta_{MAX} = 96\%$ , Luminous Flux > <b>90 lumens</b> , $V_{IN} = 3.2 \text{ V}$ to $6.2 \text{ V}$ @ $I_{OUT} = 350 \text{ mA}$ .

Table 4 Prices

Quantity	1 – 9 PC	10 – 99 PC	100 – 999 PC	≥1000 PC
SILVERLED-1N6V	\$7.89	\$7.39	\$6.79	\$6.09

### NOTICE

1. Analog Technologies, Inc. (ATI), warrants performance of its products for one year to the specifications applicable from the time of sale, except for those being damaged by excessive abuse. Products found not meeting the specifications within one year from the date of sale can be exchanged free of charge.
2. ATI reserves the right to make changes to its products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete.
3. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability. Testing and other quality control techniques are utilized to the extent ATI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.
4. Customers are responsible for their applications using ATI products. In order to minimize risks associated with the customers' applications, adequate designs and operating safeguards must be provided by the customers to minimize inherent or procedural hazards. ATI assumes no liability for applications assistance or customer product design.
5. ATI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of ATI covering or relating to any combination, machine, or process in which such products or services might be or are used. ATI's publication of information regarding any third party's products or services does not constitute ATI's approval, warranty or endorsement thereof.
6. IP (Intellectual Property) Ownership: ATI retains the ownership of full rights for special technologies and/or techniques embedded in its products, the designs for mechanics, optics, plus all modifications, improvements, and inventions made by ATI for its products and/or projects.
