FEATURES

Input Voltage Range: 90V ~ 264VAC

Output Current: 1.5AHigh Efficiency: >83%

Withstand 300VAC Surge Input for 5s

 Protections: Short Circuit/Overload/Over-voltage/Over Temperature

Forced Air Cooling

Built-in Cooling Fan On-Off Control

• 1U Low Profile

Withstand 5G Vibration Test

Wide Operating Temperature Range: −10°C ~ 60°C

Protection Level: IP20

PFC Function: NO

APPLICATIONS

The 36W single output switching power supply can be used in various applications that require a stable and efficient power supply. Here are some common applications:

- 1. Industrial automation equipment: Switching power supplies are commonly used in industrial automation equipment such as motor controllers, programmable logic controllers (PLCs), and robotic systems.
- 2. LED lighting: LED lighting requires a constant and stable power supply to function effectively. A 36W single output switching power supply can provide the necessary power to run LED lighting systems.
- 3. Telecom and networking equipment: Switching power supplies are widely used in telecom and networking equipment such as routers, switches, and modems.
- 4. Audio and video equipment: High-end audio and video equipment such as amplifiers, mixers, and video monitors require a stable power supply to ensure optimal performance.
- 5. Medical equipment: Medical equipment such as ultrasound machines, X-ray machines, and CT scanners require a reliable and stable power supply to ensure accurate readings and diagnoses.
- 6. Gaming systems: High-end gaming systems require a high-power output to run efficiently. A 36W single output switching power supply can provide the necessary power to run gaming systems.
- 7. Mining equipment: Cryptocurrency mining equipment requires a stable and efficient power supply to run continuously. A 36W single output switching power supply can be used to power mining equipment such as ASIC miners.

Overall, this 36W single output switching power supply is a versatile power supply that can be used in a wide range of applications that require a stable and efficient power supply.

DESCRIPTION AND SPECIFICATIONS

ALRS24V1R5AT is a highly efficient 36W single-output enclosed power supply with a 33mm low profile design. Equipped with a built-in long-life fan, this power supply can operate effectively at full load under temperatures ranging from -10°C to 60°C.

Not only does it offer high efficiency at over 83%, but it also comes with complete protection functions and 5G antivibration capability, ensuring reliability and safety in industrial applications. Moreover, it complies with international safety regulations, making it a top choice for a wide range of industrial applications.

Overall, the ALRS24V1R5AT power supply offers an ideal solution for industries seeking a compact, durable, and high-performance power supply that can operate in extreme conditions with complete safety and reliability.

NOTICE

- 1. It is important to carefully read and follow the warnings, cautions, and product-specific notes provided with electronic components. These instructions are designed to ensure the safe and proper use of the component and to prevent damage to the component or surrounding equipment. Failure to follow these instructions could result in malfunction or failure of the component, damage to surrounding equipment, or even injury or harm to individuals. Always take the necessary precautions and seek professional assistance if unsure about proper use or handling of electronic components.
- 2. Please note that the products and specifications described in this publication are subject to change without prior notice as wecontinuously improve our products. Therefore, we recommend checking the product descriptions and specifications before placing an order to ensure that they are still applicable. We also reserve the right to discontinue the production and delivery of certain products, which means that not all products named in this publication may always be available.
- 3. This means that while ATI may provide information about the typical requirements and applications of their products, they cannot guarantee that their products will be suitable for all customer applications. It is the

responsibility of the customer to evaluate whether an ATI product with the specified properties is appropriate for their particular application.

- 4. ATI warrants its products to perform according to specifications for one year from the date of sale, except when damaged due to excessive abuse. If a product fails to meet specifications within one year of the sale, it can be exchanged free of charge.
- 5. ATI reserves the right to make changes or discontinue products or services without notice. Customers are advised to obtain the latest information before placing orders.
- 6. All products are sold subject to terms and conditions of sale, including those pertaining to warranty, patent infringement, and limitation of liability. Customers are responsible for their applications using ATI products, and ATI assumes no liability for applications assistance or customer product design.
- 7. ATI does not grant any license, either express or implied, under any patent right, copyright, mask work right, or other intellectual property right of ATI.
- 8. ATI's publication of information regarding third-party products or services does not constitute approval, warranty, or endorsement.
- 9. ATI retains ownership of all rights for special technologies, techniques, and designs for its products and projects, as well as any modifications, improvements, and inventions made by ATI.
- 10. Despite operating the electronic modules as specified, malfunctions or failures may occur before the end of their usual service life due to the current state of technology. Therefore, it is crucial for customer applications that require a high level of operational safety, especially in accident prevention or life-saving systems where the malfunction or failure of electronic modules could pose a risk to human life or health, to ensure that suitable measures are taken. The customer should design their application or implement protective circuitry or redundancy to prevent injury or damage to third parties in the event of an electronic module malfunction or failure.
