MAIN FEATURES

- Input voltage: 110-220VAC
- 7-inch Touch Screen
- Parameters Setting
- Long Life High Temperature TEC
- Bidirectional Temperature Control
- Temperature Cycle Control
- Overcurrent, Overvoltage and Overheat Protection
- Over-temperature and Under-temperature Protection Circuit
- Large Platform for Thermal Load:
314.8mm(L)×315mm(W)×152mm(H)
- Wide Temperature Regulation Range: -10°C to 110°C
- Temperature Accuracy: 0.1°C
- 100 % Lead (Pb)-free and RoHS Compliant

APPLICATIONS

It's widely used for temperature control in industry, medical care, scientific research, etc.

DESCRIPTION

ATTP2 is a high performance temperature control air-cooling system specially designed for providing the target object with a high temperature or low temperature environment of a certain temperature, or for cycle control of heating and cooling, etc. The output load is TEC module, which can heat up or cool down objects with high precision, long life time and without noise, wear, vibration and pollution. The TEC controller TEC28V15A drives four high temperature and long life TECs for temperature control. This temperature plate assembly comes with a 7-inch touch screen and parameter setting programs, which can be used for controlling the temperature of the target object according to specific needs.

Note: The platform is made of 6063 aluminum alloy. The material, size and shape of the platform and the specifications of the TEC module can be customized.

OPERATING PRINCIPLE

1. When powering on, the screen will display the platform temperature, TEC voltage and current, etc.
2. On the screen, there are programs for setting parameters. For example, in the heating and cooling program, set the upper temperature limit to 90°C with a stabilization time of 10 seconds and the lower temperature limit to 20°C with a stabilization time of 15 seconds, and repeat such cycle for 50 times.

NOTICE

1. ATI reserves the right to make changes to its products or to discontinue any product or service without notice and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete.
2. ATI reserves the right to make changes to its products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete.
3. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability. Testing and other quality control techniques are utilized to the extent ATI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.
4. Customers are responsible for their applications using ATI components. In order to minimize risks associated with the customers' applications, adequate design and operating safeguards must be provided by the customers to minimize inherent or procedural hazards. ATI assumes no liability for applications assistance or customer product design.
5. ATI does not warrant or represent that any license, either expressed or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of ATI covering or relating to any combination, machine, or process in which such products or services might be or are used. ATI's publication of information regarding any third party's products or services does not constitute ATI's approval, warranty or endorsement thereof.
6. IP (Intellectual Property) Ownership: ATI retains the ownership of full rights for special technologies and/or techniques embedded in its products, the designs for mechanics, optics, plus all modifications, improvements, and inventions made by ATI for its products and/or projects.
